Remember to keep lawn clippings off the street-This will prevent pollutants from eventually entering the river.

Grass and Leaves Discharge

City Code 26-34 sub. 19 states throwing, placing, depositing, or burning leaves, trash, or lawn clippings, weeds, grass or other material in streets, alley, or gutters is punishable as a misdemeanor.

The depositing of the above mentioned items tend to plug gutters, catch basins, cause street flooding and adds to cleaning catch basins and streets more often plus it produces unsightly conditions.

Lets all do our part in being good neighbors and keep St. Paul Park a cleaner, safer and healthier place to live.

Thank You.
St. Paul Park Public Works Department

City of St. Paul Park, 600 Portland Avenue, St. Paul Park MN 55071

Clean Water Starts With Clean Streets

Homeowners with storm drains located by their homes are asked to help the Public Works Department to keep it clear of litter and leaves.

Blocked storm drains provide a greater chance of flooding.

Your neighbors and city will appreciate and thank you for your effort.

NOTE: In urban areas, stormwater carries phosphorus and other pollutants directly into Minnesota's water resources through the storm water drainage system. Unlike other household waste waters, stormwater doesn't go through a treatment plant first, it is dumped directly into lakes, rivers and wetlands.
